Introduction

This report contains statistical estimates of upland game bird hunting effort and harvest success in Montana during license year 2000 (LY2000). It is based on an analysis and summary of the statewide upland bird hunting and harvest survey conducted following the LY2000 hunting season (see **Survey Questionnaire** enclosure). Information on sampling effort, return and response rates, and survey results are presented below. Estimates of the number of hunters and successful hunters, hunter days, and total harvest, plus confidence bounds at the 80% significance level and relevant ratios based on these statistics, are presented by upland game bird species hunted (separate and combined), location hunted (statewide, regional, and by county), and type of bird license held by the sportsperson (license type, licenses combined by residency, and all license types/residencies combined).

Two upland game bird table types are presented:

1. **Upland Game Bird Hunting and Harvest Table:** Estimated number of bird hunters, successful hunters, hunter days, total harvest, and ratios based on these estimates. Also presented is the percent distribution of successful hunters within 6 bag size classes.

2. **Upland Game Bird Statistical Confidence Table:** The same four basic estimated statistics presented above (Hunters, Successful Hunters, Hunter Days, Total Harvest) accompanied by their lower and upper 80% confidence bounds.

These tables are organized based on three variables: Species, Location, and License Type.

1. **Hunted Upland Game Bird Species:**

- **All Species Combined**
- **Pheasant**
- **Hungarian Partridge**
- **Chukar Partridge**
- **Sharptail Grouse**
- **Sage Grouse**
- **Ruffed Grouse**
- **Blue Grouse**
- **Spruce (Franklin's) Grouse**
- **Unknown Species**

Due to space limitations in the tables, Partridge may be abbreviated as P and Grouse as G. If no hunting was reported for a species in a location, no record will appear in the summary table.

2. **Location of Hunt:**

- **Statewide (State):** Indicates that statistics are computed without regard to County of hunt and provides an overall picture of upland bird hunting in Montana.
- **Regional (Reg 1…Reg 7, Reg U):** Statistics are computed based on MFWP Region of the County hunted. Hunting reported in an unknown County is lumped into Reg U.
- **County:** Statistics are computed based on County of hunt. Counties are organized alphabetically within Regions. No attempt is made to screen out data reporting hunting of upland game bird species in Counties where their presence is unlikely. Reported location data are presented ***as is*** so Regional managers and biologists will have the opportunity to interpret it for themselves.

3. **Upland Game Bird License Type Held by Sportsperson:**

- **All:** Statistics are computed without regard to the upland bird license held by sportspersons.
- **Residency (R/N):** Statistics are computed based on residency status of sportsperson.
- **License Type:** Statistics are computed based on type of upland bird license held.

    - **R Bird:** Sportspersons holding a standard **Resident Upland Game Bird License** (types 14 and18).
    - **R Spo 09:** Sportspersons holding a **Resident Sportsman (without Bear) License** (type 09).
    - **R Spo 11:** Sportspersons holding a **Resident Sportsman (with Bear) License** (type 11).
    - **R Spo 40:** Sportspersons holding a **Resident Youth Sportsman License** (type 40).
    - **N Bird:** Sportspersons holding a standard **Non-resident Upland Game Bird License** (type 22).
    - **N Com BG:** Sportspersons holding a **Non-resident Big Game Combination License** (types 83, 84).
    - **N Com DE:** Sportspersons holding a **Non-resident Deer Combination License** (types 85, 86, 87).
    - **N Com EL:** Sportspersons holding a **Non-resident Elk Combination License** (types 88, 89).

Following the convention used in past years, those **hunters holding upland game bird hunting privileges based only on age or disability status** in combination with a conservation license, and not holding conservation license types 09, 11, 83, 84, 85, 86, and 87, or bird license types 14, 18, and 22, **were not included** in the surveyed population of bird hunters, nor were their numbers used to compute expansion factors for bird hunting and harvest estimates. Including these sportspersons could potentially add significant numbers of fisherpersons or hunters of other game species who have little or no intent to hunt upland game birds.

Expansion Factors for Upland Game Bird Statistics

All statistics presented are estimates based on the underlying upland game bird survey response set for a particular combination of the various levels of Species hunted, Location hunted, and License Type held. **Upland game bird expansion factors were derived for each License Type based on the population of holders of that License Type divided by the number of holders returning survey responses for that License Type.** A low expansion factor (close to 1) indicates a high response rate, and relatively good statistical precision in the hunting or harvest estimate. Good statistical precision is reflected in relatively narrow 80% confidence bounds on the estimate. An expansion factor significantly higher than 1 indicates a low response rate, relatively poor statistical precision, and relatively wide 80% confidence bounds on the estimate.

A second factor influencing precision of a hunting or harvest estimate is the raw number of upland bird survey responses reporting hunting activity or harvest, for a given combination of location, license type, and species. These survey response counts are multiplied by the expansion factor to obtain the hunting or harvest estimate. A higher total count of responding active hunters, or reported kill, will result in better statistical precision of the hunting and harvest estimates than lower counts.

Upland bird hunting and harvest expansion factors computed by all levels and groupings of License Type were applied across all levels and groupings of location and species. The number of licenses sold and the expansion factors used are presented in **Table 1**. Eighty percent confidence levels on hunter and harvest estimates are presented in the **Statistical Confidence Tables** as an index of the relative precision of the estimates.

Statistics at the Residency level lump License Type holders and respondents by Residency status, resulting in statistical estimates of hunting and harvest without regard to underlying License Type within Residency class. Statistics at the "All" License Types combined level lump all holders regardless of

Residency status, resulting in estimates without regard to Residency or License Type. The sum of underlying harvest estimates for the individual License Types will not necessarily equal the estimate for the corresponding Residency class, nor will the sum of the two estimates by Residency necessarily equal the estimate for the "All" License Types category. Separate estimates were computed for each higher lumped category. The more heterogeneous the underlying sub-populations, the more the overall estimates will vary from the sum of the underlying estimates.

Relative statistical precision will be better for estimates at levels and groupings of location, license type, and species where the response rate is relatively higher (the expansion factor is lower), and the total reported number hunting or harvesting is relatively higher. Total reported hunters and kill accumulate as the three grouping variables are lumped into higher levels. Therefore, relative precision of the estimates get better. For example, precision in the Statewide estimates will generally be better than precision in Regional estimates, which will generally be better than precision in the County level estimates. In general, the worst relative precision in the estimates occur at the finest level of response data splitting. This is particularly true at the County level for upland bird species with relatively restricted populations or low hunter interest.

Estimates of Hunters and Successful Hunters by Species will not sum to the "All" Species estimate because an individual hunter may hunt and harvest more than one species. Estimates of Hunter Days and Total Harvest will sum across Species to the "All" estimate because hunters report days and kill by individual species, and the same expansion factor is used to obtain the estimates for all Species for a given License Type Class.

Similarly estimates of Hunters and Successful Hunters by County will not sum to the corresponding Regional or Statewide estimates because an individual hunter may hunt and harvest in more than one County and Region. The Hunter Days and Total Harvest estimates will sum across locations because hunters report days and kill by County, and the same expansion factor is used to obtain the estimates for all Locations for a given License Type Class.

In cases where there was no upland bird hunting success, some of the ratios comparing harvest within defined categories will be undefined. These are flagged in the tables as **–0.0**.

Overall Sampling Effort and Results

Montana resident upland game bird sportspersons were surveyed primarily by phone, while non-residents were surveyed by mail. **Table 1** presents overall statewide counts of upland game bird sportspersons, sampled sportspersons, and sportspersons who provided valid responses, by the various License Type categories described above. Expansion factors, sportspersons divided by sportspersons returning valid responses, are also presented. Expanded statistics were computed at all levels of Species, Location, and License Type by multiplying the non-expanded statistics by the expansion factor of the matching License type. The estimated number of active upland game bird hunters is derived from the number of responses where the hunter indicated bird hunting effort, multiplied by the corresponding expansion factor for the License Type.

Table 2 presents the various rates derived from the counts in Table 1, expressed as percents. **Sample rate** is the percent of game bird sportspersons that were surveyed for game bird hunting and harvest information. **Return rate** is the percent of surveyed game bird sportspersons who returned valid game bird survey information. **Response rate** is the percent of game bird sportspersons who returned valid game bird responses. **Hunting rate** is the estimated percent of game bird sportspersons expending effort hunting upland birds.

Upland Game Bird Hunting and Harvest Tables

The upland game bird Hunting and Harvest Tables present basic game bird hunting and harvest statistics, and ratios based on these statistics, for various levels and combinations of Species hunted, Location hunted, and License type held. These tables are organized as follows:

- **By Species**
  - **State and Regional, All License Permit Types Combined**
  - **By County, All License Permit Types Combined**
  - **State and Regional, by License Permit Type**

- **All Species Combined**
  - **State and Regional, by License Permit Type**
  - **By County and Residency**

To compare statistics between Species and Locations, without regard to License Type, refer to the "By Species, State and Regional" or "By Species, by County" tables. To compare results between Regions and Residency/License Types, for a given Species, refer to the "By Species, State and Regional, By License Type table. For an overall view of all upland game bird hunting, without regard to Species, refer to the "Species Combined" tables.

The following statistics were computed for all Species, Location, and License Type level combinations:

- **Hunters:** Point estimate of number of sportspersons (tag holders) that actively hunted.
- **Success Hunters (Successful Hunters):** Point estimate of number of hunters that harvested one or more game birds.
- **Hunter Days:** Point estimate of number of days or partial days hunters spent hunting for game birds.
- **Total Harvest:** Point estimate of total number of birds harvested.
- **Percent Success:** Number of successful hunters divided by number of hunters. An estimate of the percent of hunters harvesting one or more upland birds.
- **Days Per Hunter:** Number of hunter days divided by number of hunters. An estimate of the average number of days a hunter spent hunting upland birds.
- **Kill Per Hunter:** Total harvest divided by number of hunters. An estimate of the average number of upland birds harvested by hunters, including unsuccessful hunters.
- **Kill Per Day:** Total harvest divided by number of hunter days. An estimate of the average number of birds harvested per day hunted.

In addition, the percent of successful hunters by bag size class was calculated:

- **Bag Sz 1:** Percent of successful hunters harvesting 1 bird of a given species at a given location.
- **Bag Sz 2:** Percent of successful hunters harvesting 2 birds of a given species at a given location.
- **Bag Sz 3:** Percent of successful hunters harvesting 3 birds of a given species at a given location.
- **Bag Sz 4-6:** Percent of successful hunters harvesting 4 to 6 birds of a given species at a given location.
- **Bag Sz 7-9:** Percent of successful hunters harvesting 7 to 9 birds of a given species at a given location.
- **Bag Sz >9:** Percent of successful hunters harvesting more than nine birds of a given species at a given location.
-

Upland Game Bird Statistical Confidence Tables

The upland game bird Statistical Confidence tables present point estimates of the basic statistics described above, but also provide the lower and upper 80% confidence bounds on these estimates. These supplemental tables are provided on the principle that point estimates should always be judged in the light of the variability expected in the estimate. This variability is reflected in the relative width of the confidence bounds provided for the estimate. Statistical confidence tables are provided in the following views:

- **By Species**
  - **State and Regional, by License Permit Type**
  - **By County, All License Permit Types Combined**

- **All Species Combined**
  - **State and Regional, by License Permit Type**
  - **By County and Residency**

Statistics provided include:

- **Hunters:** Point estimate of number of sportspersons (tag holders) that actively hunted.
- **Hunters Low Bnd:** Lower bound of 80% confidence interval on number of hunters.
- **Hunters Up Bnd:** Upper bound of 80% confidence interval on number of hunters.
- **Success Hunters (Successful Hunters):** Point estimate of number of hunters that harvested one or more birds.
- **Suc Hunt Low Bnd:** Lower bound of 80% confidence interval on number of successful hunters.
- **Suc Hunt Up Bnd:** Upper bound of 80% confidence interval on number of successful hunters.
- **Hunter Days:** Point estimate of number of days or partial days hunters spent hunting for game birds.
- **HDays Low Bnd:** Lower bound of 80% confidence interval on number of hunter days.
- **HDays Up Bnd:** Upper bound of 80% confidence interval on number of hunter days.
- **Total Harvest:** Point estimate of total number of birds harvested.
- **Harvest Low Bnd:** Lower bound of 80% confidence interval on total harvest.
- **Harvest Up Bnd:** Upper bound of 80% confidence interval on total harvest.

Appendix A

2000 Upland Game Bird Hunting and Harvest Statistics

Data File Description

Upland Game Bird
Hunting and Harvest Statistics

Description of Data File

License Year 2000

Montana Fish Wildlife and Parks

Harvest Surveys

August 8, 2001

This document contains a description of the License Year 2000 Upland Game Bird Hunting and Harvest Statistics data file. This file was exported from the original Oracle data table used to produce the **2000 Upland Game Bird Hunting and Harvest Report**. The data is distributed in a **Comma Separated Value ASCII text file** where character values are quoted and numeric values are not. Numeric values were exported to 2 decimal places. Headers are not included. The data files have the extension ***.Csv**. They are accompanied by ***.sch** files which define the file format and column types. Two additional definition data files are included. **County00_UGBird.Csv** contains definitions of County codes, and **Species00_UGBird.Csv** contains definitions of species abbreviations, used in the LY2000 Hunting and Harvest Stats data table.

This documentation is available in 3 formats, Word, Rich Text Format, and Simple Text (**UGBirdHHStatsData2000.Doc, *.Rtf, *.Txt**). Descriptions and column definitions for the data file are given below:

UbHh00_010809.Csv – Upland Game Bird Hunting and Harvest Statistics Data Table

- **Loc (Location)**: **STA**=Statewide; **R01..R07,R09**=Regional 1..7,Unknown; ###=County Code (see enclosed **County00_UBird.Csv**).
- **Lic_Type: ALL**=All bird license types of all residencies, **Res (Residency)**= **R**=Residents of MT or **N**=Nonresidents. **License Type=R_UGB** (R bird licenses 14,18), **R_S09** (Sportsman 09), **R_S11** (Sportsman 11), **R_S40** (Sportsman 40); **N_UGB** (N bird license 22), **N_CBG** (N Combo Big Game 83,84), **N_CDE** (N Combo Deer 85,86,87), **N_CEL** (N Combo Elk 88,89).
- **Species**: **ALL**=All upland species combined. **By Spp**=Species designated by 3 letter code as defined in enclosed **Species00_UGBird.Csv**.
- **Sort_Loc, Sort_LT, Sort_Spp:** Assist in sorting the records by the 3 variables defined above.
- **Sales**: Number of Upland Game Bird licenses issued, and number of holders of those licenses, for associated Lic_Type.
- **Exp_Fact (Expansion Factor)**: Number of holders of associated Lic_Type divided by number holders held by sportspersons returning valid survey responses used in analysis.
- **Hunt (Hunters)**: Point estimate of number of sportspersons actively hunting.
- **Hunt_L (Hunters Lower Bound)**: Lower 80% confidence bound on active hunters.
- **Hunt_U (Hunters Upper Bound)**: Upper 80% confidence bound on active hunters.
- **Eff_Rec (Effort Records)**: Sum of number of Counties and Species hunted within County reported by all active hunters. Used in computation of various meaningful ratios.
- **SucHunt (Hunters)**: Point estimate of number of active hunters successful in harvesting.
- **SucHunt_L (Hunters Lower Bound)**: Lower 80% confidence bound on successful hunters.
- **SucHunt_U (Hunters Upper Bound)**: Upper 80% confidence bound on successful hunters.
- **Suc_Rec (Success Records)**: Sum of number of Counties and Species hunted within County reported by all successful hunters.
- **HDays (Hunter Days)**: Sum of number of days or partial days spent hunting birds by all hunters.
- **HDays_L (Hunter Days Lower Bound)**: Lower 80% confidence bound on hunter days.

- **HDays_U (Hunter Days Upper Bound)**: Upper 80% confidence bound on hunter days.
- **Harv (Harvest):** Pt estimate of number of birds harvested.
- **Harv_L (Harv Low Bnd)**: Lower bound of 80% confidence interval on harvest.
- **Harv_U (Harv Up Bnd)**: Upper bound of 80% confidence interval on harvest.
- **PctSucc (Percent Success)**: Percent of active hunters that were successful hunters (harvested).
- **Suc_BSC1** (Success Records by Bag Size Class 1): Suc_Rec where harvest is 1 bird. Used to calculate percent success by bag size class 1.
- **Suc_BSC2** (Success Records by Bag Size Class 1): Suc_Rec where harvest is 2 birds. Used to calculate percent success by bag size class 2.
- **Suc_BSC3** (Success Records by Bag Size Class 1): Suc_Rec where harvest is 3 birds. Used to calculate percent success by bag size class 3.
- **Suc_BSC4** (Success Records by Bag Size Class 1): Suc_Rec where harvest is 4-6 birds. Used to calculate percent success by bag size class 4.
- **Suc_BSC5** (Success Records by Bag Size Class 1): Suc_Rec where harvest is 7-9 birds. Used to calculate percent success by bag size class 5.
- **Suc_BSC6** (Success Records by Bag Size Class 1): Suc_Rec where harvest is more than 9 birds. Used to calculate percent success by bag size class 6.

Various ratios and percents further describing upland game bird hunting and harvest can be computed based on these provided statistics. Please refer to the **LY2000 Upland Game Bird Hunting and Harvest Report** for definitions of these ratios and percents and examples of their use.

Upland Game Bird Hunting and Harvest Statistics were computed for certain combinations and groupings of values of the 3 variables Loc, Lic_Type, and Species:

Species Combined to ALL

Loc	Lic_Type	Spp	Explanation
STA	ALL	ALL	Statewide, license type and species combined to ALL.
STA	R&N	ALL	Statewide, by residency, species combined to ALL.
STA	R_UGB..N_CEL	ALL	Statewide, by eight bird license types, species combined to ALL.
R01..R07,R09	ALL	ALL	Regional, license type and species combined to ALL.
R01..R07,R09	R&N	ALL	Regional, by residency, species combined to ALL.
R01..R07,R09	R_UGB..N_CEL	ALL	Regional, by eight bird license types, species combined to ALL.
County ###	ALL	ALL	By County, license type and species combined to ALL.
County ###	R&N	ALL	By County, by residency, species combined to ALL.

For Each of 9 Bird Species

Loc	Lic_Type	Spp	Explanation
STA	ALL	9 Spp	Statewide, license type combined to ALL, by 9 bird species
R01..R07,R09	ALL	9 Spp	Regional, license type combined to ALL, by 9 bird species
County ###	ALL	9 Spp	By County, license type combined to ALL, by 9 bird species
